

PRANAV S

OBJECTIVE

With a passion for continuous growth and learning, I am determined to make a positive impact in the tech industry. My goal is to thrive in the ever-evolving field by embracing new challenges and opportunities to expand my knowledge and skills.

ACHIEVEMENTS

- Won II prize in paper presentation at TechFiz conducted by SREC
- Participated in MLSE Hackathon conducted by SREC
- Finalist in Hackfest (2023) Top 100 (all over India) conducted by PSG iTECH
- Finalist in IIT PALS (2023) conducted at IIT Madras (Top 40 From all over India)

PROJECTS

DAM WATER MANAGEMENT INCORPORATED WITH RAINFALL FORECASTING

This project aims to enhance dam water management by integrating advanced rainfall forecasting. By developing algorithms that use real-time rainfall data and predictive modeling, the project seeks to provide dam operators with accurate forecasts for inflow patterns. These forecasts will inform decision-making around water release schedules, reducing the risk of flooding and ensuring optimal reservoir levels.

EFILA - AI BASED E-WASTE SEGREGATION & RECYCLING

EFILA aims to revolutionize e-waste management using AI-based segregation and recycling. By employing advanced artificial intelligence, the project seeks to automate the sorting of electronic waste for efficient recycling processes. This innovative approach promises to streamline e-waste processing, enhance recycling efforts, and reduce environmental impact.
